

SECRET

27 DEC 1971

MEMORANDUM FOR: Executive Officer, Office of Logistics

SUBJECT : Proposed Schedule for Environmental Protection Agency (EPA) Water Effluent Surveys at [REDACTED] Printing Services Building, and 2430 E Street Facilities

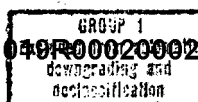

REFERENCE : Memo dtd 11 May 71 to C/SOS/DDS fm EO/OL, Subject: CIA Pollution Abatement Responsibilities and Activities

1. This memorandum is for your information only. It concerns the proposed schedule for EPA's initial visits to subject facilities. Paragraphs 5 and 6 of the reference cited the investigations and planning regarding these particular facilities.

2. Pollution abatement efforts are being channeled through the General Services Administration since it has the basic responsibility and should exercise it. However, in order to provide some impetus, a direct contact was made on 21 December 1971 between [REDACTED] OL/RECD Project Engineer, and Mr. George Williams, Office of Water Programs, EPA, Philadelphia, Pennsylvania. In response to the direct inquiry, Mr. Williams stated that he believed he could schedule his proposed visits beginning in late January 1972. He also stated he would probably elect to have an expert on photographic wastes accompany him on the survey; presumably this expert would act as EPA's consultant and participate in the study of effluent wastes from the various buildings inspected. Mr. Williams was advised to provide the name of the individual in advance of any proposed visit.

3. Since three separate facilities in the Metropolitan Area are involved, [REDACTED] indicated the order of precedence as follows:

- a. [REDACTED]
- b. Printing Services Building
- c. 2430 E Street Facilities

4. Although Mr. Williams was advised to provide GSA
with his proposed schedule of visits and to contact Mr.
Terman, GSA Region 3, directly in this matter, it is planned
to continue direct OL/RECD contacts in the future.
